

Helping teachers, learners, and educational systems learn from data

I'm Josh Rosenberg, Haslam Family Professor and Associate Professor of STEM Education at the University of Tennessee, Knoxville. I study the use of data in education: how new data sources and methods can help us understand teaching, learning, and educational systems, and how students and teachers can learn to work with data themselves.

Much of this work happens in partnership with teachers and schools, especially in science classrooms.

Featured Projects & Resources

[Project CREDIBLE](#)

An NSF CAREER-funded research-practice partnership on helping students learn with data in science classrooms.

[Learn more](#)

Making Data Science Count

My research group. We study educational data science, data science education, and STEM learning.

Writing & Photography

I also write and take photos, mostly about family, hiking, and life in East Tennessee. With my wife, Katie, I wrote *Hiking Knoxville: Family Friendly Adventures from the City to the Smokies* (University of Tennessee Press, 2026), and I write an occasional newsletter, [Educated Guesses](#).
